

**What was achieved last week?**

*Finished the UI wireframes and basic backend structure*

*Team roles were also assigned*

**What is the focus for today?**

Worked on the dashboard, login/logout system, database planning, and initial ERD design

**What blockers exist?**

The database was not yet implemented and the ERD was still incomplete

**What went well?**

*The frontend and backend setup was strong and organized*

**What didn't go well?**

*Authentication was still not finished and some features could not be tested*

**What should we start doing?**

Improve the login system and continue database design

**What should we continue doing?**

*Continue clear communication between teams*
