

What was achieved during this period?

Continued integration work, improved authentication, and finalized most parts of the database and ERD

What is the focus for today?

Continued development after Holy Week and worked on system stability and database improvements

What blockers exist?

There was a retreat on April 8, which paused development

What went well?

Work continued smoothly after the retreat

The database structure became more organized

What didn't go well?

Some tasks were delayed due to the retreat schedule

What should we start doing?

Catch up on delayed tasks

What should we continue doing?

Continue communication and system integration
