

What was achieved last week?

We improved UI consistency and fixed minor authentication bugs

What is the focus for today?

We worked on Attendance Record, dashboard layout, and integration testing

What blockers exist?

Some API responses were inconsistent

What went well?

UI became more consistent and authentication improved

What didn't go well?

Some UI and integration issues still exist

What should we start doing?

We should start full system testing

What should we continue doing?

We should continue bug fixing and UI improvement
