Progress Report for Backend

What was achieved last week?

None

What is the focus for today?

My task for this week is to review my code, study and list down what I need for my end.

What blockers exist?

No communication.

What went well?

I got in touch with my groupmates and planning for what to do.

What didn't go well?

I just open my code.

What should we start doing?

To review my code and think critically on what to do. Learning what is "Service".

What should we continue doing?

I should study the "service" and the purpose.
